# ProxKey Signer

DOCUMENT SIGNER

- DOCX Signer main function is to digitally sign DOCX, XLSX and PPTX documents.

- Using this product you can quickly sign multiple files (bulk sign) by selecting input and output directory. This is ideal for batch signing of large number of corporate documents rather than signing each one individually.

- DOCX Signer allows you to digitally sign documents without any need to purchase additional software.

BENEFITS:

- Support for certificates issued on smart cards
- Batch (bulk) digital signature (sign an entire folder)
- Command line parameters

PKI Interoperability:

DOCX Signer is completely PKI neutral and will work with PKI components from any vendor (this includes CAs, certificates, CRLs, smartcards, etc.)

Requirements:

X.509 digital certificate , Microsoft .NET Framework 2.0 , Windows 7 & above
